

Web Developer Specification

Note: Every editing form, search form and filters are expected to be done with AJAX so that users do not have to reload pages performing those tasks.

1. Homepage

- Big heading with a search bar to search courses.
- Top 3 courses – make a slider if possible.
- Ajarin Dong Bro's Twitter feed^{*}.

2. Mata Kuliah Index

- Filters By: Universitas dan Jurusan.
- Default filter by latest added course.

3. Mata Kuliah

- Heading with the name of the course.
- Daftar button and forum button – for student. Tambah materi and forum button – for tutor who has the authority to tutor the course otherwise disable the button.
- Materi section containing all material week by week (videos, cheat sheets – pdf files and so on). Users who are not enrolled or registered in the course can only see the first two weeks material, when they access the third show them a pop up offering to buy the course.
- Tutor section containing a little bit of profile summary of the tutor.

4. Student Dashboard / Profile

- Big heading with profile picture and details of username, jurusan and universitas name.
- List of enrolled course and latest seen course.
- Setting section to change profile settings such as name, profile picture, email, password and so on.

5. Tutor Dashboard / Profile

- Big heading with profile picture and details of username, jurusan and universitas name.
- List of tutored course and latest seen course.
- Setting section to change profile settings such as name, profile picture, email, password and so on.
